WORK EXPERIENCE

Business Advisor & Content Lead

MAR 2025—PRESENT

CHIBITRONICS[↗], REMOTE · CONTRACT

- Partnered with engineering to develop the Explore Chibitronics learning hub (LMS), shaping content structure and platform requirements.
- Led content structure and information architecture for a full Chibitronics website redesign, partnering with design and development to improve navigation and findability for educators, makers, and crafters.
- Directed a brand refresh as external advisor, establishing consistent tone, style, and voice guidelines across web and product content.
- Managed content briefs and contributor deliverables for new product launches, coordinating timelines across teams to expand the Chibitronics paper circuits system.

Head of Education

FEB 2019—FEB 2024

STRAWBEES[↗], REMOTE

- Partnered with engineering to develop the Strawbees Classroom Learning Management System (LMS), shaping content structure and platform requirements through the transition from product to SaaS.
- Owned content strategy and editorial standards for the Strawbees Classroom platform, authoring and editing 100+ resources including lesson plans, project guides, teacher articles, and marketing and packaging copy, maintaining consistent quality and voice across all published material.
- Applied SEO best practices across Strawbees Classroom and the Strawbees website to improve content discoverability and organic search performance.
- Established editorial workflows and instructional design standards for all platform content, briefing and reviewing work from contracted educators, photographers, and designers to maintain quality at scale.
- Led localization and international rollout of platform content across Europe and Asia, owning approvals, timelines, and partner communications with institutional partners including UN Information Centres and the Swedish Institute.
- Managed go-to-market product and content launches with external partners, from brief through publication.
- Contributed to the e-commerce storefront launch, writing product pages and store copy optimized for SEO and Google search visibility.
- Organized and maintained the GitHub and GitLab repositories used as the content backend, structuring file organization and version control for the content team.
